- C. Special protective equipment and precautions for fire-fighters**
 - Rescuers should put on appropriate protective gear.
 - Evacuate area and fight fire from a safe distance.
 - Many liquids are lighter than water.
 - Most vapors are heavier than air. They will spread along ground and collect in low or confined areas
 - Substance may be transported hot.
 - Vapors from liquefied gas are initially heavier than air and spread along ground.
 - Ruptured cylinders may rocket.
 - Move containers from fire area if you can do it without risk.
 - Fire involving Tanks; Do not direct water at source of leak or safety devices; icing may occur.

 - Fire involving Tanks; Cool containers with flooding quantities of water until well after fire is out.
 - Fire involving Tanks; Withdraw immediately in case of rising sound from venting safety devices or discoloration of tank.
 - Fire involving Tanks; Always stay away from tanks engulfed in fire.
 - Fire involving Tanks; For massive fire, use unmanned hose holders or monitor nozzles; if this is impossible, withdraw from area and let fire burn.
 - Damaged cylinders should be handled only by specialists.
 - Use extinguishing agent suitable for type of surrounding fire.

6. Accidental release measures

- A. Personal precautions, protective equipment and emergency procedures**
